| B350 | 90 cm | 36” | 380 L |

* Non-standard size - subject to special conditions.
Metallic balloons are slightly smaller due to their latex composition.
The D11 and B105 balloons are the same size, but the D11 has a longer neck and a rounder shape than the B105.
The specifications of Belbal balloons are measured in lab conditions and can differ as environmental conditions change.
Balloon colours in this document reflect the true colours of fully inflated balloons as close as possible.
Real balloon colours may differ.
